

Workplace Security and Disaster Response

Presented by:

- Paul Chistolini, Deputy Commissioner
GSA Public Buildings Service
- Mel Basye, Director Technology & Security Division
GSA Federal Protective Service

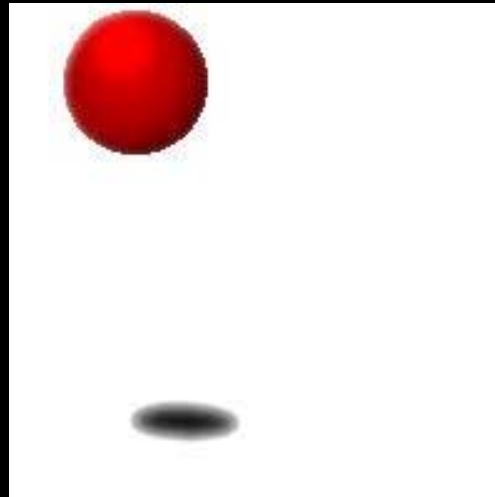

Overview of PBS

- Our role as the federal government's civilian landlord; portfolio and mission

Disaster Recovery

- How GSA enabled its customers to recover from September 11 -- and lessons learned

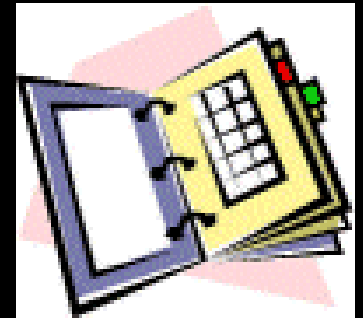

Assessing Risk

- What model is GSA using for federal buildings -- and how are we doing things differently

Assuring Documentation

- What type of records should be kept - and how to store - about the building, its occupants, and systems?

Granting Access

- Considerations in differentiating among occupants and visitors -- levels of background checks, etc.

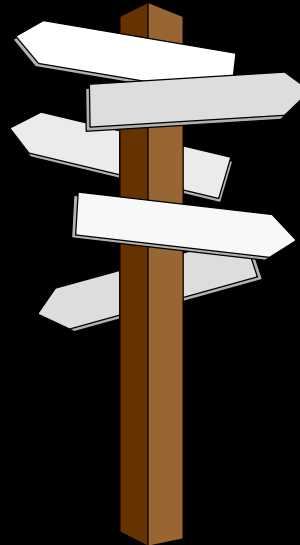

Biological Threats

- Combating threats via the mailroom - or the ventilation system

Emergency Plans

- The crucial importance of having up-to-date plans and procedures...and ensuring occupants are familiar with them!

Openness vs. Security

- Where to draw the line - both physical and informational?

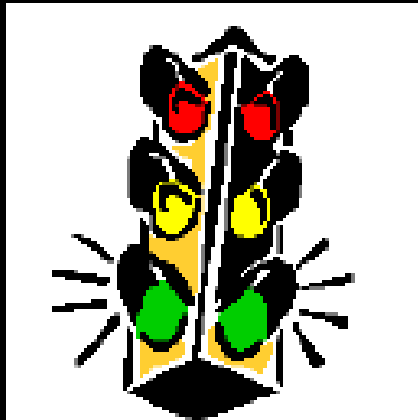

New Oklahoma City Building

- A model for transparent security features

Future of Building Security

- Value added... or necessary burden?

GSA

Questions and Discussion
